Professional Profile

Enthusiastic IT student in the 4th year of a Computer Science Engineering program, with expertise in React, Next.js, MongoDB, and TypeScript. With hands-on experience in these technologies and a well-rounded skill set, I am passionate about technology. I have completed numerous academic and personal projects, including a personal booking platform project, demonstrating my ability to develop functional and efficient systems. I am eager to make a positive impact within any IT department.

Core Skills

- Problem solving
- Coding
- UX
- TypeScript
- Next.js
- Web development
- HTML
- SQL
- React.js
- MongoDB

Education

- **Bachelor of Engineering in Computer Science** | Uniwersytet Kaliski | Oct 2021 - Mar 2025 | During my studies, I focused on areas such as data structures, algorithms, software engineering, and web development. I have practical experience from projects, including developing a CRM system using React.js and creating dynamic landing pages with Next.js. Additionally, I have enhanced my knowledge through online courses and tutorials on platforms like Udemy and YouTube, which have helped me stay updated with the latest industry practices and technologies.

Career Summary

Aug 2023 - Present

**Helpfind, Ostrów Wielkopolski
Front-end Developer**

Outline

During my journey in that company, I worked on tasks from a Kanban board, focusing on developing landing pages and CRM systems using React. I also contributed to writing and optimizing reusable components.

Key Responsibilities

- Contributed to the CRM system's migration to a modern tech stack, enhancing performance and usability.
- Wrote and optimized reusable components, improving the efficiency and consistency of the codebase.
- Collaborated with team members using a Kanban board, managing tasks and prioritizing development efforts.

Key Achievements

- Successfully migrated over 50% of the CRM system from PHP to React, resulting in a significant improvement in system speed and user experience.
